

# Хеш-суммы ко всем текстовым материалам Левашовых, включая иллюстрации

Сборник содержит хеш-суммы к оригинальным текстовым материалам, а так же к иллюстрациям, созданным Николаем Викторовичем Левашовым и Светланой Левашовой и выложенным в разное время в электронном виде на официальном [сайте](#). Задача - дать возможность определить оригинальность нужного материала в целях изучения, сравнения, подготовки к печати..

#### ПРИМЕЧАНИЯ:

- \* **Распространение **метаданных** о материалах не является распространением самих материалов, в том числе тех, которые временно признаны экстремистскими;**
- \* *В Интернете встречаются разные версии материалов разного времени, ввиду того, что материалы скачивались с официального сайта в разное время и в большом количестве. В данном документе собраны хеши, в основном, с полных вариантов материалов разного времени, но не позже 2012 года (за одним исключением). Версии обновлений сверялись со [снепшотами](#) официального сайта и его зеркал;*
- \* *Имена файлов не имеют принципиального значения - при изменении имени файла его хеш-сумма не меняется. Имена файлов даны здесь такими, какими они были изначально на официальном сайте - даны только для удобства в ориентировании при сравнении хешей;*
- \* *Выводимый в свойствах файла размер в разных ОС и в разных программах может быть показан с разным допуском. Поэтому, имеет смысл опираться на точный размер файла в байтах;*
- \* *При проверке материалов на оригинальность недостаточно опираться на размер файла - обязательна проверка хешей;*
- \* *Даты создания/изменения файлов могут не соответствовать оригинальным, когда материалы распакованы из архива;*

- \* *Даты обновлений материалов приводятся только для файлов в формате doc - по фактической дате последнего изменения документа;*
- \* *Хеши архивов (.zip) не приводятся - только хеши конкретных материалов;*
- \* *При проверке материалов на оригинальность нежелательно опираться на устаревшие алгоритмы хеширования. Лучше использовать разные или все вместе;*
- \* *Разнообразию в алгоритмах хеширования необходимо для усложнения возможной подмены материала и для универсальности - обеспечения совместимости со старым программным обеспечением и оборудованием старых моделей.*
